Advancements in science & technology (Agenda 2025 Organised Programme)		
Purpose of the Programme	Programme Summary	
<p>The 'Health and Well-being Week' will focus on the key question of 'How do we realize a society where the well-being of each person resonates? , and we will explore solutions together with people from around the world. Agenda 2025, organised by the Japan Association for the 2025 World Exposition, envisions a future in which everyone is connected to society and reaches a healthy state/well-being fairly, and discusses the global issues to be solved to make this a reality.</p>	<p>In this programme, we will set the question 'How can we approach the unmet health and well-being needs through the advancement in science and technology?' and we will discuss these questions in a panel discussion.</p> <ul style="list-style-type: none"> •What unmet needs exist in the scope of health/well-being currently? •How are advances in science and technology being used to address current unmet needs? •What barriers can be considered when implementing science and technology to address unmet needs? <p>What is needed to ensure accessibility for all people, and what are the challenges?</p> <p>What should be done to further accelerate innovation in the future?</p> <p>Experts and intellectuals from around the world will discuss these issues and develop solutions.</p> <p>Moderator: Kai Kupferschmidt (Freelance science journalist, contributing correspondent for 'Science' magazine)</p>

HEALTH DESIGN Live Brighter		
Purpose of the Programme	Programme Summary	
<p>In a future where people and technology coexist, cutting-edge technologies will expand the potential of the human body, revolutionize the concept of "living," and bring us new hope. It will be a world where each person can live a vibrant life true to themselves, enhance their willingness to take on challenges, and re-evaluate society from a broader perspective, realizing new values and ways of living. We are leading the world in presenting this vision of a future where everyone can shine through health and medical exhibitions and events.</p>	<p>HEALTH DESIGN is an exhibition and experiential event that showcases the current state of wellness and healthcare in Japan, in conjunction with the "Health and Well-being" themed week. The venue consists of 11 booths in total, where visitors can experience various exhibits and the latest medical equipment and information from Japan. (Ministry of Economy, Trade and Industry/Ministry of Health, Labor and Welfare, etc).</p> <p><Topics you can experience in HEALTH DESIGN></p> <ul style="list-style-type: none"> ① Regenerative medicine, cell therapy and gene therapy ② Exhibition of assistive devices and technologies aimed at promoting the independence and social participation of people with disabilities ③ Dementia simulations and exhibits to promote a proper understanding of dementia ④ Providing information on advanced Japanese pharmaceuticals and other medical products. ⑤ Promoting the use of technology in the actual care field ⑥ Health for All : The Vital Role of Universal Health Coverage (UHC) ⑦ PHR service experiences at the EXPO 2025 ⑧ Next-generation Medical and Assistive Devices utilizing the latest technologies

Health and Climate Change: The Double Challenge of Our Time		
Purpose of the Programme	Programme Summary	
Climate change poses significant threats to public health, particularly among vulnerable populations living under conditions of inequity. Disadvantaged communities, often marginalized and overlooked, find themselves on the front lines of climate-induced health risks. The urgency of the moment demands concerted action across all fronts to safeguard the health and well-being of every individual, with particular attention to those under vulnerable situations. In this context, addressing the intersection of climate change and health requires multifaceted approaches that leverage science, technology, and innovation to enhance resilience, surveillance systems, and education within the healthcare sector.	<p>This session will address the interdependence between health and climate change, highlighting the importance of joint action to achieve the goals of the 2030 Agenda and the Paris Agreement. It will bring together experts and representatives from different sectors to discuss solutions and strategies for strengthening the relationship between both agendas. The debate and exchange of experiences among the participants has the potential to contribute to the development of more effective actions to address climate change and to promote global health.</p> <ul style="list-style-type: none"> •Event format: Round table •Speakers: Dr. Paulo Gadelha (M.D.) researchers, scientists and managers from public institutions, federal, state, and local governments, UN agencies from Asian countries, key actors from the African continent, and others.

Japan Health		
Purpose of the Programme	Programme Summary	
In Japan, sector-specific academic exhibitions are prevalent, contributing to the growth of the domestic market. However, they also face challenges related to excessive imports. Given this situation, and leveraging our global outreach at Informa Markets, we have decided that now is the right time to host "Japan Health" in Osaka, with the theme of "Designing a Future Society Where Life Shines," in anticipation of the 2025 World Expo.	<p>As a sister exhibition to Arab Health, one of the world's largest international healthcare and medical equipment trade shows in Dubai, we will be holding the inaugural "Japan Health" in Osaka in June 2025.</p>  <p>2025年6月25日(水) - 27日(金) インテックス大阪</p> <p>■ 出展カテゴリ (一例) <small>※Japan Healthはヘルスケア・医療業界に関する企業であればどのような業種でも出展可能です。</small></p> <ul style="list-style-type: none"> ● 医療機器と装置 ● 健康・美容・ドクターズサプリメント ● 臨床検査 ● 介護・リハビリ (By Care Show Japan) ● デジタルヘルス ● 製造と設計 (By Medtec Japan) ● ヘルスケア IT ● 消耗品と消費財 ● 再生医療 ● ヘルスケアと一般サービス ● 医薬品関連
