

| Initiative Name | Summary | Team Name | Main Areas of Initiative |
|-------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|--------------------------|
| Art for life - Heritage for Development | An initiative to achieve peace and social cohesion by transforming traditional cultural resources in rural areas into economic activities to improve income and quality of life | Contact Base | India |
| Building a Sustainable Future with the Power of Co-Creation: JICA Kansai/DRLC | Training for government officials and experts in developing countries to enhance disaster prevention preparedness, drawing on disaster prevention experiences and lessons learned from Japan's past major disasters | JICA Kansai/DRLC 株式会社 | Japan |
| Carbon Negative Project | An initiative to achieve carbon-negative outcomes through co-creation with diverse businesses through the creation of a student-led biochar platform | Ritsumeikan University | Japan |
| Clean water supply for the future of communities | An initiative to promote environmental stewardship and community resilience by providing clean water to vulnerable communities throughout North and South America | uni masaqueri Alliance | USA |
| Completely biodegradable and compostable sanitary pads | An initiative to replace conventional plastic sanitary napkins with biodegradable and compostable alternatives made from banana leaves. By shifting to a circular economy model, this initiative aims to improve the living environment for women, including menstrual hygiene management | Saathi | India |
| Creating a Future Wearing Paper Thread Products | An initiative to develop and globally promote a unique Japanese paper fibre made primarily from natural "paper" fibres, inspired by traditional Japanese "washi" paper, introducing new possibilities for sustainable and comfortable living both domestically and internationally | Team Kamiito | Japan |
| Deaf Translator | An initiative to develop comprehensive communication solutions for the deaf (DeafTranslator Project) | TensorUnit | Benin |
| Empowering Off-Grid Communities via Solar Energy | An initiative to develop portable and scalable solar panel systems for off-grid areas. Through practical workshops, local communities can learn to operate the systems independently, contributing to improved living standards | YY ReGen | Lebanese |
| Fashion for Fragile Ecosystems | An initiative led by women artisans to connect traditional Kyrgyz designs with ethical fashion to improve livelihoods and promote gender equality | Mountain Partnerships | Kyrgyz |
| Field Data Terroir Branding Project | An impact startup that uses satellite data and AI technology to provide services that accurately analyse crop growth and soil conditions across large agricultural areas | Farm Data Terroir Branding | Japan |
| From Osaka to the World! Project to Support Human Health with MR | An initiative to provide a new approach to rehabilitation care using cutting-edge mixed reality (MR) technology, bringing new approaches to physical therapy | Techlico Inc. | Japan |
| GoodVision for all people | An initiative to produce affordable eyeglasses that can be quickly replicated and distributed worldwide, providing accessible eyewear for those in need. One Dollar Glasses | EinDollarBrille e.V. | Burkina Faso |
| Innovative Solutions for Child-Friendly Spaces | An initiative that transforms original backpacks into convertible study desks, creating a more supportive learning environment for children in impoverished areas such as Nepal | Educase | Nepal |
| Microscope Unveils the Macro-World's Scope | An initiative to make expensive, high-quality atomic force microscopes (AFM) affordable and accessible for educational institutions | Strömlinet Nano | Denmark |
| Nepal Soil Health Initiative | A Nepal-based initiative to promote the "One Dollar Soil Test Kit" app, which helps smallholder farmers determine optimal fertilizer usage, improving soil health and crop productivity, particularly in South Asia and Africa | ATC Nepal | Nepal |
| PEEL Lab | An initiative to collect pineapple leaves and other plant waste from farms and repurpose them as sustainable materials for eco-friendly vegan leather products, offering an alternative to animal leather | PEEL Lab | Japan |
| Poverty Alleviation through Entrepreneurship | An initiative to break the cycle of poverty by providing tailored entrepreneurial training programs that equip economically disadvantaged women with business skills and self-confidence, empowering them to pursue self-sustaining livelihoods | Street Business School | Worldwide |
| Restoring forgotten watersheds through youth-led m | A youth-led initiative in collaboration with various stakeholders to address biodiversity crises, climate change, and flood issues through forest restoration activities in the Philippines | Masungi Georeserve | Philippines |
| Revolutionize your mobility | An initiative to provide access to affordable and customised prosthetics to people with disabilities worldwide, supporting their mobility and independence | Cure Bionics | Tunisia |
| Seaweed Enriches People and Seas, Enriches Health | An initiative to develop next-generation land-based seaweed cultivation using sunlight and natural seawater, contributing to global food security, health, and environmental restoration, as a collaborative project between private companies, Tokushima Bunri University and Tokushima University. | kaisoulab | Japan |
| Sustainable water and floating farm solutions | An initiative to address global water scarcity and arable land shortages through zero-energy, zero-CO2 desalination technology and sustainable floating farms that utilise water cycles | MANHAT | UAE |
| Transforms care, trains responders, saves lives | An initiative to provide innovative solutions for emergency medical response situations such as traffic accidents, through a specially developed app | Health Emergency Innovation | Nigeria |
| Turning CO2 into Chalk: Sustainable Innovation | An initiative to contribute to the urgent global issue of climate change mitigation by capturing atmospheric CO2 and converting it into high-quality chalk for artistic use, creating sustainable art material | OOYOO Ltd. | Japan |
| Wikiproject for a United Nations of knowledge | An initiative in partnership with UNESCO and UN organisations to ensure worldwide access to verified information on Wikipedia, helping bridge the knowledge gap | FAO Publications | Worldwide |
| Zero Waste Co-Creation Network | An initiative originating in Kyoto to address global waste issues by establishing a waste reduction platform and developing a cleanup activity support app, encouraging individuals worldwide to take personal responsibility for diverse waste-related challenges | Kyoto Beyond SDGs | Japan |
